WHO WE ARE

ACSC, or the Algerian Cyber Security Center, is a web site dedicated to promoting cyber security awareness and offering resources and solutions for individuals and businesses in Algeria. The site covers a broad range of topics related to cyber security, including information on the latest threats, best practices for securing networks and devices, and tools and techniques for detecting and responding to cyber attacks.

WHAT WE DO

ACSC offers a variety of services to help individuals and organizations in Algeria better protect themselves from online threats, our key services include:

Reporting Cyber Issues

ACSC provides a platform for Algerian citizens and organizations to report cyber security issues they have encountered. This includes incidents such as hacking attempts, phishing scams, and malware infections. Our reporting system helps individuals and organizations quickly and easily report cyber security issues so we can investigate and take appropriate action.

Reporting IOC

ACSC also offers a platform for individuals and organizations to report indicators of compromise (IOCs). This includes IP addresses, domain names, and other data related to known or suspected cyber threats. By collecting and analyzing this data, we can better understand the threat landscape in Algeria and take proactive measures to protect our users.

Website Scanning

ACSC provides a website scanning service that helps individuals and organizations identify vulnerabilities in their web applications and websites. Our scanning tools analyze websites for common security issues, such as SQL injection and cross-site scripting (XSS) vulnerabilities. We then provide detailed reports and recommendations to help website owners mitigate these risks.

Data collecting

ACSC collects and analyzes data related to cyber threats targeting Algeria. we aim to gain valuable insights into security-related incidents, enabling us to identify trends, patterns, and potential vulnerabilities. Through our data-driven approach, we strive to enhance security measures and proactively address emerging threats, ultimately promoting a safer digital environment for our users and stakeholders.

Help us to help others

Sharing informative reports is crucial for us to comprehend the threat landscape and enhance the cyber intelligence capabilities. This subsequently improves our ability to help protect other Algerian organisations.
